Answer 1 · The Hanoverian Succession and Its Significance

THE QUESTION · CSS 2019 · Q3 · Section A · 20 marks

What was the political and constitutional significance of the Hanoverian succession in England?

ANSWER MAP · CSS 2019 · Q3 · SECTION I

What was the political and constitutional significance of the Hanoverian succession in England?

KEY WORDS “political significance” · “constitutional significance” · “Hanoverian succession”

IT DEMANDS Two named dimensions. POLITICAL: parties, Jacobitism, who governed. CONSTITUTIONAL: the crown's title, the cabinet, the prime minister, ministerial responsibility. Keep them apart, then show how they interacted.

Figure 1 · The answer map for CSS 2019 · Q3 · Section A: every branch is one heading of the answer below.

DECODING THE QUESTION

Two named dimensions. **Political**: who governed, the fate of the parties, Jacobitism. **Constitutional**: the basis of the crown's title, the cabinet, the prime minister, ministerial responsibility. Keep the two apart under separate headings, then show how the political facts produced the constitutional changes. A good answer also states the **limits** — the Crown was still strong.

The model answer

(1) Introduction and thesis

On **1 August 1714** Queen Anne died and the crown passed, under the **Act of Settlement of 1701**, to **George Louis, Elector of Hanover**, over more than fifty Catholics with a better hereditary claim. The succession was smooth, but its consequences were profound. **Politically** it gave the Whigs a monopoly of office for nearly fifty years and left Jacobitism as a permanent rival. **Constitutionally** it confirmed that the crown was held by **Act of Parliament**, and — because the new kings were foreign and often absent — allowed **cabinet government** and the office of **prime minister** to grow in the space the monarch left empty.

(2) How the succession was managed

- The **Act of Settlement** (1701) named **Sophia of Hanover** and her Protestant heirs; she died in June 1714, so her son succeeded.
- The **Regency Act** (1706) provided named Lords Justices to govern until the new king arrived, which made the transfer orderly.
- **Bolingbroke**, the Tory Secretary of State, had been corresponding with the Pretender; he was dismissed and fled to France in 1715 — an act that condemned his party for a generation.

Political significance

(3) The Whig supremacy

George I owed his throne to the party that had made the Act of Settlement, and he distrusted the Tories who had made the Peace of Utrecht. He therefore gave office to the **Whigs** — and the **Tories were proscribed**, shut out of the ministry, the court, the bench and the lord-lieutenancies, until **1760**. The consequence was one-party government under **Walpole** (1721–42) and the **Pelhams**, sustained by patronage and by the **Septennial Act** of **1716**, which extended the life of a Parliament to seven years.

(4) Jacobitism as the permanent alternative

Because the Stuarts had the better hereditary claim, the Hanoverian regime faced a rival court in exile throughout the period:

- the **Fifteen** (1715) under the Earl of Mar, defeated at **Sheriffmuir** and **Preston**;

- the **Forty-Five** (1745–46), which reached **Derby** before ending at **Culloden**;
- French-backed attempts in 1708 and 1759.

Jacobitism justified the standing army, tied the Tories to treason in the public mind, and gave the Whigs a monopoly of loyalty.

(5) Politics as management

With one party in office and no ideological divide, politics became a contest of **connections** — Walpole's, Newcastle's, Bedford's — inside the Whig camp. As **Namier** argued, eighteenth-century politics is best understood through **interest, family and patronage** rather than programme.

Constitutional significance

(6) A parliamentary crown

George I was king **because Parliament said so**. After 1714 the doctrine of indefeasible hereditary right survived only among Non-Jurors and Jacobites. The Revolution principle of 1689 — that the succession is a matter of statute — was now beyond argument.

(7) Cabinet government

George I spoke little English, was deeply interested in Hanover, and spent long periods abroad. He ceased to attend cabinet regularly. Ministers therefore **met, deliberated and reported**. What began as convenience hardened into **convention**: the cabinet as a body that decides collectively and presents united advice.

(8) The office of prime minister

Someone had to lead that cabinet, manage the Commons and speak to the king. From **1721** that man was **Sir Robert Walpole**, who held the Treasury and the Exchequer, stayed in the **Commons**, and enforced cabinet unity by driving out rivals such as **Townshend** (1730). The title "prime minister" began as an insult; the **office** grew because the system needed it.

(9) Ministers responsible to the Commons

The decisive precedent came in **1742**, when Walpole resigned — not because the King dismissed him, but because he had **lost his majority**. This is the foundation of modern parliamentary government.

(10) The Act of Settlement's restrictions

The same Act that brought the Hanoverians tied them to Britain: the monarch must be **Anglican**; Britain must not go to war for the monarch's foreign possessions without Parliament's consent; and **judges** hold office during good behaviour, removable only on an address of both Houses.

THE WHIG OLIGARCHY: MERITS, DEMERITS AND DOWNFALL

Forty-six years of one-party rule (1714–1760), and why it ended

Figure 2 · The political consequence of 1714: half a century of Whig rule — its merits, its demerits and its end.

(11) The limits of the change

The Crown remained powerful. It **chose ministers**, controlled the vast patronage of the state, made war and peace, and could destroy a ministry by withdrawing its confidence. **George III** demonstrated all of this after 1760, when he ended the proscription of the Tories and appointed **Bute**. The constitutional shift of 1714–60 was a matter of **practice**, not of new law, and it could be — and was — partly reversed.

(12) Conclusion

Politically the Hanoverian succession delivered Britain to the **Whigs** for half a century, made **Jacobitism** the permanent alternative, and turned politics into the management of interests. Constitutionally it confirmed that the crown rests on **statute**, and allowed the **cabinet** and the **prime minister** to develop — culminating in Walpole's resignation of 1742, the moment when a minister first fell because the Commons, and not the king, had withdrawn its support.

WHY THIS ANSWER SCORES

Both named dimensions get their own block of headings, and the answer explains **how** the political facts (a foreign, absent king; a proscribed opposition) produced the constitutional results. The limits section prevents the common error of describing 1714 as the birth of modern democracy.

Answer 2 · Walpole in Four Roles

THE QUESTION · CSS 2015 · Q4 · Paper I · 20 marks

Evaluate analytically and critically the role of Walpole as Secretary of State, Prime Minister, party organiser and financier.

ANSWER MAP · CSS 2015 · PAPER I · Q4

Evaluate analytically and critically the role of Walpole as Secretary of State, Prime Minister, party organiser and financier.

KEY WORDS "Evaluate analytically and critically" · "Secretary of State" · "Prime Minister" · "party organiser" · "financier"

IT DEMANDS Four named roles — give each its own heading, with achievements AND criticisms. "Evaluate critically" demands a verdict on each and on the whole.

**VERDICT**

Walpole was a great manager and financier rather than a great statesman: he made the Hanoverian regime safe and the office of prime minister real — at the price of a politics of patronage.

Figure 3 · The answer map for CSS 2015 · Q4 · Paper I: every branch is one heading of the answer below.

DECODING THE QUESTION

The question names **four roles** — Secretary of State, Prime Minister, party organiser and financier. Give each its own heading; in each, state the achievement and then the criticism, because "evaluate analytically and critically" demands judgement, not description. End with an overall verdict.

The model answer

(1) Introduction and thesis

Sir Robert Walpole (1676–1745) dominated British politics for **twenty-one years**, from **1721 to 1742** — still the longest tenure of any British prime minister. He was supreme as a **manager of men and money** and limited as a **statesman**: he made the Hanoverian regime safe and the office of prime minister real, but he did so by building a system of patronage that his critics called the "**Robinocracy**" and that left Britain unreformed.

(2) Role one: minister of the Crown

(i) The offices

Walpole rose through **Secretary at War** (1708) and **Treasurer of the Navy**, was imprisoned in the Tower by the Tories in 1712 — which made him a Whig martyr — and returned after 1714. From 1721 he held **First Lord of the Treasury** and **Chancellor of the Exchequer** together, uniting policy and money in one pair of hands.

(ii) Managing the monarch

No eighteenth-century minister could survive without the king. Walpole kept the confidence of **George I**, and of **George II** after 1727 — largely through Queen **Caroline**, the king's closest adviser. His enemies said he governed by the back stairs; but the constitution still gave the Crown the choice of ministers, and managing it was part of the job.

(iii) The criticism

His dependence on court favour was a weakness as well as a strength: it made him vulnerable whenever the heir to the throne (Frederick, Prince of Wales) became the focus of opposition.

(3) Role two: prime minister in the making

(i) What he created

- He refused a peerage and stayed in the **Commons**, recognising that the House that voted money held the power.
- He insisted on **cabinet solidarity**, forcing out **Townshend** (1730) and **Carteret**: ministers were to speak with one voice.
- He accepted **10 Downing Street** from George II in 1735 as an official residence for the First Lord of the Treasury.

- He **resigned in 1742** when his majority failed — the precedent that matters more than any title.

(ii) The criticism

He never claimed the title and denied being a prime minister at all, because the term implied an unconstitutional concentration of power. He also destroyed able colleagues rather than work with them, which left a shallow bench when he fell.

(4) Role three: party organiser

(i) The machine

- **Patronage**: places in the customs, excise, army, navy and church; pensions; government contracts.
- The **Septennial Act** (1716) gave seven years between elections — long enough to manage a majority.
- The Treasury and the great borough patrons together managed elections in a system of **rotten and pocket boroughs** with perhaps one adult man in five able to vote.
- He kept the **Tories** out by identifying them with **Jacobitism** — an identification the Fifteen and the Forty-Five made easy.

(ii) The criticism

This was corruption organised as government. Parliament was **managed** rather than representative; opposition was reduced to a faction around the Prince of Wales; and the system postponed every question of reform for a century.

(5) Role four: financier

(i) The achievements

- After the **South Sea Bubble** (1720) he restored confidence and protected the Crown and ministers from the worst of the scandal — the "**Screen-Master General**".
- He revived the **sinking fund** to reduce the National Debt and kept government credit cheap.
- He cut the **land tax** to **1s in the pound** by 1732 — the tax paid by the gentry who sat in Parliament, which was also shrewd politics.
- He encouraged trade by reducing duties on exports and raw materials.

(ii) The excise scheme of 1733

His plan to replace customs duties on wine and tobacco with **excise** — collected in bonded warehouses, which would have cut smuggling and fraud — was sound finance and good administration. A propaganda campaign about "excisemen" invading English homes ("**no slavery, no excise, no wooden shoes**") forced him to withdraw it. He accepted defeat rather than force it through: "I will not be the minister to enforce taxes at the expense of blood."

THE WALPOLE SYSTEM

How the first prime minister governed for twenty-one years

Figure 4 · The Walpole system: how methods, policies and results reinforced one another.

(6) The critical case against Walpole

- Corruption institutionalised:** the machine outlived him and became the target of every reformer from Wilkes to the Younger Pitt.
- No reform:** Ireland, the colonies, the law, the Church and the poor were all left untouched.
- A narrow foreign policy:** his peace was valuable, but his refusal to think about the colonial struggle left Britain unprepared in 1739, and he then fought the War of Jenkins' Ear without conviction.
- Intolerance of rivals:** the talent he excluded — Carteret, Chesterfield, Pitt — became a permanent opposition.

(7) Assessment

The four roles supported each other: patronage bought the majority; the majority secured the king's confidence; the king's confidence delivered the Treasury; the Treasury supplied the patronage. **Plumb** credits him with creating the political stability Britain had lacked since 1642; **Namier** would say the system, not the man, explains the politics. Both agree the achievement was real.

(8) Conclusion

Walpole was a great **manager** and a great **financier** rather than a great statesman. As a minister of the Crown he mastered the court; as prime minister in all but name he created the

office; as party organiser he built a machine that gave Britain fifty years of stability; as financier he restored the nation's credit and kept taxes low. The price was a politics of patronage and a generation of unreform — a price his own country paid after 1760.

WHY THIS ANSWER SCORES

Each of the four named roles is a heading, and each carries both achievement and criticism, which is what "evaluate analytically and critically" demands. The closing assessment shows the roles as one system rather than four separate topics — the analytical point that lifts the answer.

Answer 3 · The Merits, Demerits and Downfall of Whig Rule

THE QUESTION · CSS 2017 · Q2 · Section A · 20 marks

What were the merits and demerits of Whig rule? What led to the downfall of Whig ascendancy? Analyze comprehensively.

ANSWER MAP · CSS 2017 · Q2 · SECTION I (ALSO 2020 · Q2)

What were the merits and demerits of Whig rule? What led to the downfall of Whig ascendancy? Analyze comprehensively.

KEY WORDS “merits” · “demerits” · “Whig rule” · “what led to the downfall” · “Analyze comprehensively”

IT DEMANDS Three named limbs: merits, demerits, causes of downfall. Give each a section, weigh them, and end with a verdict on whether the oligarchy was good for Britain.

Figure 5 · The answer map for CSS 2017 · Q2 · Section A: every branch is one heading of the answer below.

DECODING THE QUESTION

Three named limbs: **merits**, **demerits**, and **what led to the downfall**. “Analyze comprehensively” means each limb must be argued with evidence and then weighed. Define the period first (1714–60), or the answer will drift into the nineteenth century.

The model answer

(1) Introduction and thesis

Between **1714** and **1760** one party held office almost without interruption. The **Whig oligarchy** — sometimes called the Whig supremacy or ascendancy — rested on the Hanoverian succession, the proscription of the Tories, and a system of patronage perfected by **Walpole** and **Newcastle**. It gave Britain the political **stability** it had lacked for a century, and it did so at the cost of **corruption** and of a Parliament that represented property rather than people. It fell after 1760 because a new king wanted his own ministers, and because the Whigs, without an enemy, dissolved into factions.

(2) How the Whigs came to monopolise power

- **1714:** George I distrusted the Tories, who had made the Peace of Utrecht and whose leader **Bolingbroke** fled to the Pretender.
- **1715:** the Jacobite rising confirmed the taint; "Tory" and "Jacobite" became interchangeable in Whig propaganda.
- **1716:** the **Septennial Act** stretched parliaments to seven years.
- **1720–21:** the **South Sea Bubble** destroyed rivals and brought **Walpole** to the top.

(3) The merits

(i) Political stability

Britain had endured civil war, regicide, a republic, a restoration, a revolution and two disputed successions between 1642 and 1714. After 1714 it had fifty years without any of them. **J. H. Plumb** argued that this stability was **created**, not inherited — by single-party rule, the Septennial Act and patronage.

(ii) Peace, trade and low taxation

Walpole kept Britain out of European war from 1721 to 1739. Trade, shipping and customs revenue grew; the **land tax** fell to 1s in the pound; government credit was cheap, which mattered greatly when war came.

(iii) The Revolution Settlement secured

The Protestant succession survived two risings. No minister attempted to revive the prerogative powers destroyed in 1689; the Bill of Rights and the Act of Settlement became part of the furniture of politics.

(iv) Constitutional development

Cabinet government and the office of **prime minister** took shape in these years, and in 1742 a minister resigned because he had lost the **Commons** — the central convention of British government.

(v) Practical toleration and a free press

Dissenters were protected by annual **Indemnity Acts**; the press, unlicensed since 1695, was noisy and critical; after 1746 there were no political executions.

(4) The demerits

(i) Government by patronage

Places, pensions, sinecures and contracts held the majority together. Perhaps a fifth of MPs were **placemen**. Contemporaries called it the "**Robinocracy**"; modern historians call it management.

(ii) An unrepresentative Parliament

Rotten and pocket boroughs returned members for a handful of voters — **Old Sarum** is the standing example — while growing towns like Manchester and Birmingham returned none. About **one adult man in five** could vote in England.

(iii) Oligarchy

A few great families — Pelham, Cavendish, Russell, Campbell — monopolised office, honours and church preferment. Disraeli later called them a "**Venetian oligarchy**".

(iv) No opposition, and no reform

With the Tories proscribed, opposition was reduced to a "Patriot" faction around **Frederick, Prince of Wales**. Nothing was reformed: not Parliament, not the law, not the Church, not the poor law, not Ireland, not colonial government.

(5) What led to the downfall

Cause	How it worked
George III (1760)	A British-born king of 22 who meant to choose his own ministers; he ended the proscription of the Tories and built the " King's Friends "
Bute (1762)	The King's tutor made prime minister; the Whig families found themselves in opposition for the first time in half a century
Factionalism	Without a common enemy the Whigs split into Rockingham, Grenville, Bedford and Chatham connections — seven ministries between 1760 and 1770
New political forces	Wilkes and the Middlesex elections; general warrants; the reporting of debates (1771); petitions and "economical reform"
The American crisis	A system built for management had no answer to an imperial question requiring imagination; failure abroad discredited it at home

THE WHIG OLIGARCHY: MERITS, DEMERITS AND DOWNFALL

Forty-six years of one-party rule (1714–1760), and why it ended

Figure 6 · The Whig oligarchy in three columns: merits, demerits, and the causes of its fall.

(6) The historians' debate

- **Plumb:** the oligarchy produced the stability that made everything else — commerce, empire, the Enlightenment in Britain — possible.
- **Namier:** it was never a "party" in the modern sense; politics was structured by interest and family, and George III's actions in 1760 were entirely constitutional.
- **Butterfield:** Namier went too far; principle and party did matter, and the Whigs did stand for the Revolution.

(7) Conclusion

The merits of Whig rule were **stability, peace, prosperity and the quiet growth of the constitution**; its demerits were **corruption, oligarchy and the complete absence of reform**. It fell not because the country rose against it but because **George III** exercised a power the constitution gave him, and because the Whigs had become a collection of connections with nothing to say to a changing country. The oligarchy bought stability with patronage: a bargain that was worth making in 1714 and indefensible by 1760.

WHY THIS ANSWER SCORES

The three named limbs are separated and each is argued with evidence, not asserted. The downfall table shows five distinct causes rather than one, and the historians' paragraph supplies the "comprehensive analysis" the question asks for.

Answer 4 · The Same Question, Re-angled

THE QUESTION · CSS 2020 · Q2 · Section A · 20 marks

What are the merits and demerits of the Whig oligarchy? Critically examine the causes of the downfall of Whig ascendancy.

DECODING THE QUESTION

Compare the two wordings. **2017**: "What were the merits and demerits of Whig rule? What led to the downfall of Whig ascendancy? Analyze comprehensively." **2020**: "What are the merits and demerits of the Whig **oligarchy**? **Critically examine the causes of the downfall** of Whig ascendancy." The material is the same; the **weighting** is different.

How to adapt Answer 3

	2017 wording	2020 wording
Weighting	Roughly equal between the three limbs	The downfall carries more weight: "critically examine the causes"
Command word	"Analyze comprehensively" — cover the ground	" Critically examine " — test each cause and rank them
Key noun	"Whig rule"	"Whig oligarchy " — define the word and use it
Suggested split of 35 minutes	12 / 12 / 11	9 / 9 / 17

The three changes to make

- 1. Define "oligarchy" in the introduction.** Government by a small group — here, perhaps forty great families holding office, honours and patronage; the electorate about one adult man in five; the Tories excluded. Using the question's own word in your definition earns marks immediately.
- 2. Expand the downfall into the main section,** with a heading for each cause and a judgement on each:
 - **George III's accession (1760)** — necessary and sufficient? It removed the proscription and the Whigs' monopoly of the King's confidence. *The decisive cause.*
 - **Bute's ministry (1762)** — the proof rather than the cause.
 - **Whig factionalism** — a pre-existing weakness that George III's action exposed.
 - **Wilkes and popular radicalism** — evidence that opinion outside Parliament now mattered; a symptom more than a cause.

- **The American crisis** — destroyed the system's reputation, but after its political monopoly had already gone.
3. **Rank them explicitly:** the accession of George III was the **trigger**; the Whigs' internal decay was the **underlying cause**; Wilkes and America were **accelerators**. A "critically examine" question is marked on exactly this ranking.

The conclusion to use for 2020

The Whig oligarchy fell because a king determined to use his lawful powers met a party that had lost its purpose. George III's accession in 1760 was the occasion, and Bute's appointment the demonstration; but the deeper cause was that fifty years of unopposed management had turned a party into a collection of connections, incapable of meeting the demands of a new reign, a new public and a new empire.

WHY THIS ANSWER SCORES

Examiners set the same family of question repeatedly, changing the angle (Master Anatomy, Part 3.4). Showing the two wordings side by side, and the different time split they demand, is worth more than a second full answer.

Short Notes

The Jacobite Revolt of Scotland

THE QUESTION · CSS 2015 · Q8(c) · Paper I · short note (10 marks)

Write a short note on: **Jacobite Revolt of Scotland**

DECODING THE QUESTION

A short note of **10 marks**, about 450–600 words in 17 minutes. Use the five-part shape: definition → background → main events → significance → one-line assessment. "The Jacobite Revolt of Scotland" means the risings as a whole; concentrate on the **Forty-Five**, with the Fifteen as background.

(1) Definition

Jacobitism was the movement to restore the exiled **Stuart** line — **James II**, his son **James Francis Edward** (the "Old Pretender") and his grandson **Charles Edward** (the "Young Pretender") — to the thrones of Britain. Its name comes from the Latin *Jacobus*, James. Its main risings were the **Fifteen** (**1715**) and the **Forty-Five** (**1745–46**).

(2) Background

James II was deposed in **1688**; the **Act of Settlement** (1701) gave the crown to Hanover. Jacobitism drew on the **dynastic** claim, on **Catholicism** in parts of the Highlands and Ireland, on **Episcopalianism** in north-east Scotland, on **anti-Union** feeling after **1707**, and on **French** interest in weakening Britain.

(3) The main events

(i) The Fifteen

The Earl of **Mar** raised the standard at Braemar in September 1715 and gathered perhaps 10,000 men. The indecisive battle of **Sheriffmuir** (13 November) and the surrender at **Preston** the next day ended it; the Old Pretender arrived in December and left in February.

(ii) The Forty-Five

- **August 1745**: Charles Edward lands with seven companions and raises his standard at **Glenfinnan**.
- **September**: he takes **Edinburgh** and wins **Prestonpans**.
- **November–December**: he invades England, takes **Carlisle** and reaches **Derby** on **5 December** — causing panic in London ("Black Friday") — before his chiefs insist on retreat.
- **January 1746**: a last victory at **Falkirk**.

- **16 April 1746:** the Duke of **Cumberland** destroys the Highland army at **Culloden** in under an hour.

(4) Why it failed

No **English** Jacobite rising; no **French** landing; only about 5,000 men against three converging armies; the Lowlands, the towns and the Presbyterian Kirk hostile; and the government's command of the sea and of credit.

(5) The aftermath and significance

About 120 executions, including **Lord Lovat** (1747), and roughly a thousand transportations. The **Act of Proscription** (1746) banned Highland dress and disarmed the clans; the **Heritable Jurisdictions Act** (1747) abolished the chiefs' private courts — the legal end of the clan system. Forfeited estates were annexed and "improved"; military roads and **Fort George** secured the Highlands.

(6) Assessment

The Forty-Five was the most serious internal challenge the Hanoverian regime ever faced, and its defeat settled three things: the **dynasty** was safe, the **Highlands** were opened to the state and to emigration, and Britain was free to turn its whole strength against France overseas — which it did within ten years, in the Seven Years' War. As **Bruce Lenman** argues, Jacobitism was a serious political movement, not merely a romantic lost cause.

Answer 5 · Chatham: "A Glorious Success Until 1761 and Then Failure"

THE QUESTION · CSS 2022 · Q3 · Section A · 20 marks

'A glorious success until 1761 and then failure.' Do you agree with this estimate of the career of Chatham?

ANSWER MAP · CSS 2022 · Q3 · SECTION A

'A glorious success until 1761 and then failure.' Do you agree with this estimate of the career of Chatham?

KEY WORDS "A glorious success until 1761" · "then failure" · "Do you agree" · "career of Chatham"

IT DEMANDS A quotation with a date in it. Test both halves: was he a glorious success to 1761? Was he a failure after it? Then agree, disagree or qualify — and say why 1761 is the hinge.

**VERDICT**

Agree, with a qualification: Chatham was a magnificent war minister and a poor politician. 1761 is the right hinge, but the failure after it grew from the same pride and isolation that made the success before it.

Figure 8 · The answer map for CSS 2022 · Q3 · Section A: every branch is one heading of the answer below.

DECODING THE QUESTION

A quotation with a **date** in it. Test **both halves** — was he a glorious success to 1761? was he a failure after it? — and then say whether you agree, disagree or agree with qualification. You must explain **why 1761** is the hinge; that is where the analysis lives.

The model answer

(1) Introduction and thesis

William Pitt the Elder (1708–78), from 1766 **Earl of Chatham**, directed Britain's war effort from 1757 to 1761 and led a ministry from 1766 to 1768. The estimate quoted is broadly **right but too neat**. Pitt was a magnificent **war minister** and a poor **politician**, and 1761 is the correct hinge — but the same qualities of pride, independence and refusal to build a party produced both the triumph before it and the collapse after it.

(2) Before 1756: the outsider

Pitt entered Parliament in 1735 as the "**Cornet of Horse**" and made his name attacking **Walpole's** peace policy and the **Hanoverian subsidies** — "a great kingdom made a province of a despicable electorate". As **Paymaster-General** (1746–55) he refused the customary perquisites, which gave him a reputation for incorruptibility in a corrupt age. George II disliked him and kept him from high office until national emergency made him unavoidable.

Limb one — the case for "glorious success" to 1761

(3) He took over a losing war

Britain entered the **Seven Years' War** in 1756 with **Minorca lost** and Admiral **Byng** awaiting court-martial. Pitt's claim — "**I know that I can save this country and nobody else can**" — was arrogant and, as it turned out, justified.

(4) He devised a winning strategy

- **Subsidise Prussia:** Frederick the Great tied down the French and Austrian armies in Germany. "America was conquered in Germany."
- **Fight a maritime war:** blockade French ports, protect trade, and use the navy to carry armies against French colonies.
- **Promote by merit:** Wolfe, Amherst, Hawke and Clive were advanced over their seniors.
- **Pay for it:** unprecedented borrowing, sustained by the credit the Revolution Settlement had created.

(5) The results

1759 is remembered as the "**Year of Victories**": **Quebec** (Wolfe), **Minden**, **Lagos** and **Quiberon Bay** (Hawke). **Plassey** (1757) had already made the East India Company the power

in **Bengal**; Louisbourg fell in 1758, Guadeloupe and Senegal the same year, Montreal in 1760. Britain emerged the leading **world** power.

(6) He governed as a national leader

Pitt drew his strength from the **City of London**, the merchants and public opinion rather than from a party machine — the "**Great Commoner**" whose popularity was a political force in itself.

THE SEVEN YEARS' WAR AND THE EMPIRE OF 1763

The first world war: fought in Europe, North America, the Caribbean, West Africa, India and the Philippines. Numbers are keyed in the table opposite

Figure 9 · Chatham's war, 1756–63: the campaigns that made Britain a world power.

Limb two — the case for "then failure"

(7) The resignation of 1761

When Pitt learned of the **Family Compact** between the French and Spanish Bourbons, he demanded a pre-emptive declaration of war on Spain. The cabinet refused; he **resigned in October 1761**. Spain declared war three months later, which proved him right — but he had left office.

(8) The pension and the peerage

He accepted a pension of **£3,000 a year** and a peerage for his wife. To his admirers in the City this looked like the Great Commoner being bought; his moral authority never fully recovered.

(9) The Peace of Paris and the lost decade

Out of office, he watched **Bute** return Guadeloupe, Martinique and Manila in the **Treaty of Paris** (1763) — conquests he had won. For five years he was a figure of opposition, increasingly ill.

(10) The failed ministry of 1766–68

- He accepted the **Earldom of Chatham**, leaving the **Commons** — where his power had always lain.
- He took the sinecure office of Lord Privy Seal instead of the Treasury, so he neither led the Commons nor controlled the money.
- Severe illness and depression removed him from business for months; the ministry drifted under **Grafton**, which is how the **Townshend duties** of 1767 — a measure Chatham would never have chosen — came to be passed.

(11) Ambiguity on America

Chatham denied Parliament's right to **tax** the colonies (he rejoiced at the repeal of the Stamp Act in 1766) but insisted on its **sovereignty** over them. He opposed American independence to the end, collapsing in the Lords in April 1778 while arguing against it. It was a principled position, but it satisfied nobody.

(12) Testing the date: why 1761?

The hinge is real because it separates the two halves of his character:

War (to 1761)	Peace (after 1761)
A single clear objective — defeat France	Many competing objectives; no majority to deliver them
Authority drawn from popular acclaim	Authority requires party management, which he despised
Colleagues he could command	Colleagues he had to conciliate, and did not
Health sufficient for two years of crisis	Gout and depression that removed him for months

(13) The qualification

Even after 1761 he mattered. The repeal of the **Stamp Act** (1766) was his cause; his warnings about America were prophetic; and his reputation sustained the idea of a patriot minister above faction that later inspired his son, the Younger Pitt.

(14) Conclusion

Agree, with a qualification. Chatham's career to 1761 was a glorious success — the Year of Victories, Canada, Bengal and a world empire. After 1761 it was, in office, a failure: a resignation that surrendered influence, a peerage that removed him from his own source of power, and a ministry that disintegrated in his absence. But the failure grew from the same soil as the success: a man who would not build a party, would not conciliate rivals and would not compromise is magnificent in war and helpless in peace.

WHY THIS ANSWER SCORES

Both halves of the quotation are tested, the date is explained rather than accepted, and the comparison table makes the analytical point — the same qualities produced both outcomes — which is what a "do you agree" question rewards.

Answer 6 · Abolition, Imperialism and Economic Interests

THE QUESTION · CSS 2026 · Q2 · Section A · 20 marks

Examine the complex relationships between abolition, imperialism, and economic interests, and argue for or against the notion that Britain's anti-slavery movement was a thinly veiled justification for colonial expansion.

ANSWER MAP · CSS 2026 · Q2 · SECTION A

Examine the complex relationships between abolition, imperialism, and economic interests, and argue for or against the notion that Britain's anti-slavery movement was a thinly veiled justification for colonial expansion.

KEY WORDS "abolition" · "imperialism" · "economic interests" · "argue for or against" · "thinly veiled justification"

IT DEMANDS Take a side. Set out the economic (Williams) and the humanitarian cases, then the imperial uses of anti-slavery, and argue whether abolition was a cover for expansion. A verdict is compulsory.

**VERDICT**

Against the notion as stated: abolition was driven by evangelical conscience, popular campaigning and the resistance of the enslaved, in a context of shifting economic interest. It was not a veil for expansion — but empire afterwards wrapped itself in abolition's moral authority, and that is the real relationship the question asks about.

Figure 10 · The answer map for CSS 2026 · Q2 · Section A: every branch is one heading of the answer below.

DECODING THE QUESTION

The question asks you to **argue for or against** a proposition: that Britain's anti-slavery movement was "a thinly veiled justification for colonial expansion". You must set out the **economic** argument (Williams), the **humanitarian** argument (Drescher and others), and the **imperial uses** of anti-slavery — then take a side. The strongest answer distinguishes abolition's **origins** from its later **uses**.

The model answer

(1) Introduction and thesis

Britain abolished the **slave trade** in **1807** and **slavery** in its empire in **1833–34**, and then policed the Atlantic against slavers for sixty years. The proposition that this was "a thinly veiled justification for colonial expansion" cannot be sustained as an account of **why** abolition happened: it came a generation before the new imperialism, and it cost Britain money, ships and lives. But it is right about what happened **afterwards** — anti-slavery became the moral language in which later imperial expansion was justified. Abolition was not a veil; it became a licence.

(2) The system that was abolished

British ships carried roughly **3.1 million** enslaved Africans; about 400,000 died on the **Middle Passage**. **Liverpool**, **Bristol** and **London** grew on the trade, and the sugar islands were the most valuable colonies Britain possessed — worth more, in the debates of 1763, than the whole of Canada.

THE TRIANGULAR TRADE AND THE OLD COLONIAL SYSTEM

Manufactures out, enslaved Africans across, sugar and tobacco home — the trade Britain abolished in 1807

Figure 11 · The triangular trade that abolition destroyed.

(3) The economic argument: Eric Williams

Eric Williams, *Capitalism and Slavery* (1944), made two claims:

1. Profits from slavery and the slave trade helped **finance the Industrial Revolution**.
2. Abolition came when the West Indian interest was **declining** — over-produced sugar, the loss of the American market, competition from Cuba and Brazil, and the rise of free-trade ideas. Humanitarianism, on this view, was the respectable dress of economic self-interest.

Supporting evidence: the **Saint-Domingue revolution** (1791–1804) destroyed the richest slave colony; **Adam Smith** (1776) had argued that slave labour was the dearest of all; industrial Britain increasingly wanted **markets and raw materials** rather than plantations.

(4) The humanitarian reply: Drescher and the movement

Seymour Drescher, *Econocide* (1977), tested Williams against the trade figures and found the opposite: British slave-trading and West Indian production were **expanding** in the 1790s and 1800s. Abolition destroyed a **profitable** system — "econocide" — and must therefore be explained politically and morally.

The evidence for a genuine movement is overwhelming:

- **Evangelical religion:** the Clapham Sect, **Wilberforce**, Quakers from the 1780s; **Wesley's** *Thoughts upon Slavery* (1774).
- **Mass mobilisation:** the Abolition Society (1787), **Clarkson's** tours and evidence-gathering, petitions with hundreds of thousands of signatures, the boycott of slave-grown sugar by perhaps 300,000 families.
- **Black voices:** **Olaudah Equiano's** *Interesting Narrative* (1789), Ottobah Cugoana, and the Sons of Africa.
- **Resistance by the enslaved:** Tacky's Revolt (1760), **Haiti**, **Demerara** (1823) and the **Jamaica rising** of 1831–32, after which planters themselves admitted the system could not be held down.
- **Cost:** the **West Africa Squadron** absorbed a significant share of the navy for half a century and lost thousands of sailors to disease.

(5) How abolition served empire

The proposition is not simply wrong, because anti-slavery did real imperial work:

1. **A licence to intervene.** Anti-slavery treaties and patrols gave the Royal Navy the right to stop other nations' ships and to act on the West African coast; **Lagos** was bombarded and annexed (1851, 1861) partly on anti-slavery grounds.
2. **Moral capital.** Britain presented itself as the liberator of Africa, which answered criticism of its own conquests.
3. **The civilising mission.** **Livingstone's** campaign against the East African trade, and the **Brussels Conference of 1890**, wrote anti-slavery into the **Scramble for Africa**: suppressing the slave trade became a recognised ground for annexation.
4. **The limits of emancipation.** The **£20 million** compensation went to **owners**, not to the enslaved; **"apprenticeship"** kept people working until 1838; and indentured labour

from India and China replaced slavery in the plantations. This is the strongest evidence for the sceptical case.

(6) The argument against the proposition

- **Chronology.** The trade was abolished in **1807** and slavery in **1833**; the new imperialism in Africa began in the **1870s–80s**. A motive cannot be a cover for something that had not yet begun.
- **Cost.** Abolition destroyed a profitable trade, damaged a powerful colonial lobby and required sixty years of expensive naval patrolling.
- **Agency.** The movement's driving forces — Nonconformist religion, popular petitioning, and above all the revolts of the enslaved — were not instruments of the Colonial Office.
- **Opposition from the imperial interest.** The West India lobby, the great imperial interest of the day, fought abolition to the last.

(7) Conclusion

The relationship between abolition, empire and economics is real but sequential rather than conspiratorial. Economic change **made abolition possible**; conscience, popular politics and slave resistance **made it happen**; and empire afterwards **made use of it**. I therefore argue **against** the proposition as stated: Britain's anti-slavery movement was not a thinly veiled justification for colonial expansion, but it supplied the vocabulary and the moral authority with which a later generation justified that expansion — which is why the two are so easily, and so wrongly, identified.

WHY THIS ANSWER SCORES

The question demands a side, and the answer takes one explicitly in the introduction and the conclusion. Both historians are named and used, not just cited; the imperial uses of abolition are conceded in full, which makes the final distinction between **origins** and **uses** convincing rather than defensive.

KEY WORDS "American War of Independence" · "debit side" · "credit side" · "for Great Britain"

IT DEMANDS A balance sheet. Narrate the war briefly, then divide the consequences FOR BRITAIN into losses (debit) and gains (credit), and judge which was heavier.

Figure 12 · The answer map for CSS 2015 · Q5 · Paper I: every branch is one heading of the answer below.

DECODING THE QUESTION

"Shed light on" asks for an account of the war; the marks are in the "**debit side and credit side for Great Britain**" — a balance sheet of consequences. Narrate briefly, then divide the consequences into losses and gains, and judge which was heavier and over what period.

The model answer

(1) Introduction and thesis

The **American War of Independence (1775–1783)** cost Britain thirteen colonies, a third of its empire by population, and its reputation as the invincible power of 1763. Yet within twenty years Britain was richer, traded more with America than before, and had built a second empire in the East. The **debit** was immediate and political; the **credit** was slower, commercial and institutional.

(2) The war in brief

- **Causes:** the debt of the Seven Years' War; the **Stamp Act** (1765) and the **Declaratory Act** (1766); the **Boston Tea Party** (1773) and the **Coercive Acts** (1774); above all the constitutional question of whether Parliament could tax subjects it did not represent.
- **Course:** **Lexington** (April 1775); the **Declaration of Independence** (4 July 1776); the surrender of Burgoyne at **Saratoga** (1777) brought in **France** (1778), then **Spain** (1779) and the **Dutch** (1780); command of the sea was lost at the decisive moment, and **Cornwallis** surrendered at **Yorktown** (19 October 1781).
- **Peace:** the **Treaty of Paris** (1783) recognised the **United States**; Britain kept Canada, the West Indies, Gibraltar and India.

THE THIRTEEN COLONIES AND THE WAR OF INDEPENDENCE, 1775–1783

The Proclamation Line of 1763 shut the west; the war was decided at Saratoga and Yorktown

Figure 13 · *The war that lost the first empire.*

The debit side

(3) Territory and power

Thirteen colonies of some **2.5 million** people — the most populous and fastest-growing part of the empire — were lost. It was the first great reverse to British expansion since the seventeenth century.

(4) Prestige and strategic position

Britain had fought **without a single ally**, faced the **League of Armed Neutrality**, lost **Minorca**, and endured a three-year siege of **Gibraltar**. For the only time in the century, the Royal Navy lost control of home and American waters at the critical moment.

(5) Money

The **National Debt** rose from about £133 million to roughly **£240 million**; the land tax stood at 4s in the pound; interest charges consumed a large share of revenue and made further war impossible for a decade.

(6) Politics at home and in Ireland

Lord North's ministry fell in 1782 and **George III's** system of personal management was discredited; **Dunning's motion** (1780) had already declared that "the influence of the Crown... ought to be diminished". In **Ireland**, the Volunteers exploited Britain's weakness to win **legislative independence** in 1782 — a problem that would run to 1801 and beyond.

The credit side

(7) Trade survived the political break

The colonies had been valued for their **commerce**, and the commerce continued. Anglo-American trade recovered within a few years and by the 1790s **exceeded** pre-war levels: Britain remained America's chief supplier and market. This vindicated **Adam Smith**, whose *Wealth of Nations* (1776) had argued that the colonial monopoly cost more than it earned.

(8) The rest of the empire was kept

Canada, the **West Indies**, **Gibraltar** and — decisively — **India** remained. Rodney's victory at the **Saintes** (1782) restored naval prestige and protected the sugar islands in the final peace.

(9) Reform at home

Defeat forced change: **Burke's Economical Reform Act** (1782) cut royal patronage; the **India Act** (1784) brought the East India Company under government supervision; and **Pitt the Younger**, prime minister from December 1783, rebuilt the finances with a new sinking fund and reduced duties.

(10) A different idea of empire

Britain learned that colonies of settlement could not be governed from London indefinitely. The **Constitutional Act** for Canada (1791) granted representative institutions; in the next century the **Durham Report** (1839) and responsible government followed the same logic, and eventually the Dominions and the **Commonwealth** (Topic 8).

(11) The swing to the East

With America gone, expansion turned towards **India**, the Pacific (**Botany Bay**, 1788) and later Africa. The "second British Empire" that resulted lasted far longer than the first.

(12) The balance

	Short term (1783–1800)	Long term
Debit	Colonies, prestige, debt, political crisis, Ireland	A rival great power created in the USA
Credit	Trade recovered; empire elsewhere intact	Reform at home; self-government as an imperial principle; the eastern empire

(13) Conclusion

On the **debit side** Britain lost an empire of settlement, its military reputation and its financial margin, and was forced to concede to Ireland what it had denied to America. On the **credit side** it kept the trade without the cost of ruling, retained the rest of the empire, reformed its own government, and turned east to build a larger one. The debit was paid at once and in full; the credit accumulated over a generation. Contemporary Britain thought 1783 a catastrophe; by 1815 it looked like the price of a wider dominion.

WHY THIS ANSWER SCORES

The question's two named categories become the two halves of the answer, with a table that forces the comparison the examiner wants. Adam Smith, Dunning's motion and the Irish settlement give the analysis evidence beyond the battles.

Part Two — The Past MCQs, Solved

HOW TO USE THIS · The topic's objective questions, 2024–2026

Seven MCQs from the last three papers belong to Topic 2, with their printed options, the keyed answer and the reason.

CSS 2024 · MCQ 1

Who is the longest-serving British Prime Minister?

(A) Robert Walpole	(B) Margaret Thatcher	(C) James Callaghan	(D) None of these
--------------------	-----------------------	---------------------	-------------------

REMEMBER · Answer: A. Robert Walpole

Walpole held office from 1721 to 1742 — twenty-one years, still the longest premiership in British history. Thatcher (1979–90) was the longest of the twentieth century.

CSS 2024 · MCQ 13

Who was the British monarch during the American Revolutionary War?

(A) George I	(B) George II	(C) George III	(D) None of these
--------------	---------------	----------------	-------------------

REMEMBER · Answer: C. George III

George III reigned from 1760 to 1820 and was king throughout the American war (1775–83).

CSS 2025 · MCQ 3

What was the primary cause of the Jacobite rebellions?

(A) Religion	(B) Economics	(C) Nationalism	(D) None of these
--------------	---------------	-----------------	-------------------

REMEMBER · Answer: D. None of these — the central issue was the Stuart dynastic claim, intertwined with religion

The central issue was the **Stuart dynastic claim** — the belief that the rightful king had been deposed in 1688. Religion was bound up with it, but neither religion, economics nor nationalism alone is the primary cause, so the key is "None of these".

CSS 2025 · MCQ 4

Which issue most directly led to the American War of Independence?

(A) Slavery	(B) Taxation	(C) Trade	(D) None of these
-------------	--------------	-----------	-------------------

REMEMBER · Answer: B. Taxation

Taxation without representation — the Sugar Act (1764), the Stamp Act (1765) and the Townshend duties (1767) — was the immediate issue, though the deeper quarrel was over Parliament's sovereignty.

CSS 2026 · MCQ 3

The Seven Years' War established British dominance over:

(A) Dutch Indonesia	(B) Spanish Caribbean	(C) French North America	(D) None of these
---------------------	-----------------------	--------------------------	-------------------

Lord North was prime minister from 1770 to 1782, and therefore at the Declaration of Independence on 4 July 1776.

CSS 2026 · MCQ 14

The American War of Independence ended with the:

(A) Treaty of Paris 1783	(B) Treaty of Versailles 1783	(C) Treaty of London 1783	(D) None of these
--------------------------	-------------------------------	---------------------------	-------------------

REMEMBER · Answer: A. Treaty of Paris 1783

The **Treaty of Paris of 1783** recognised American independence. (The Treaty of Paris of 1763 had ended the Seven Years' War.)

Part Three — Five Predicted Questions, with Outlines

NOTE · Why these five

They come from the topic's **blind spots** (Master Anatomy, Part 3.6 and the T2 dossier): the Old Colonial System, the Jacobites as a full question, George III's politics, and the causes of the American war on their own.

Predicted 1 · "Explain the Old Colonial System. Why did it break down in America?"

- **Thesis:** a mercantilist system that worked while it was loosely enforced, and collapsed when victory in 1763 made Britain enforce and tax it.
- **Headings:** (1) Mercantilist theory · (2) The Navigation Acts, 1651–1750 · (3) The slave trade and the sugar colonies · (4) "Salutary neglect" in practice · (5) 1763: enforcement, taxation and the Proclamation Line · (6) The constitutional collision · (7) Verdict — the system's success created its crisis.
- **Figure:** the triangular trade map; the flow diagram of the causes of the American war.

Predicted 2 · "Give an account of the Jacobite risings of 1715 and 1745. Why did they fail?"

- **Thesis:** both failed for the same three reasons — no English rising, no adequate French help, and the financial and naval strength of the Hanoverian state.
- **Headings:** (1) What Jacobitism was · (2) The Fifteen: causes, course, failure · (3) The Forty-Five: Glenfinnan to Derby · (4) Culloden and the repression · (5) Common causes of failure · (6) Significance for Scotland and for Britain.

Predicted 3 · "Assess the reign of George III to 1783. Did he try to subvert the constitution?"

- **Thesis:** no — he used powers the constitution gave him, but he used them badly, and the loss of America discredited the attempt.
- **Headings:** (1) The old Whig charge and Namier's answer · (2) The King's aims in 1760 · (3) Bute and the King's Friends · (4) Instability, 1760–70 · (5) Wilkes and public opinion · (6) North, America and Dunning's motion · (7) Verdict.

Predicted 4 · "What were the causes of the American War of Independence? Could Britain have avoided it?"

- **Thesis:** avoidable until 1774 — the constitutional collision was real but a federal compromise (Burke's or Chatham's) was available; the Coercive Acts closed the door.

- **Headings:** (1) The legacy of 1763 · (2) The tax measures, 1764–73 · (3) The constitutional question: sovereignty and virtual representation · (4) Ideology and colonial society · (5) Missed opportunities: 1766, 1770, 1775 · (6) Verdict.

Predicted 5 · "Evaluate Britain's role in the Atlantic slave trade and its abolition."

- **Thesis:** Britain was the largest carrier of the eighteenth century and the leading abolitionist of the nineteenth — and the second fact does not cancel the first.
- **Headings:** (1) The trade: scale, ports, the triangle, the asiento · (2) Its place in the colonial economy · (3) The abolition campaign, 1787–1807 · (4) The Williams–Drescher debate · (5) Emancipation 1833 and its limits (compensation, apprenticeship, indenture) · (6) Anti-slavery and empire after 1833 · (7) Verdict.
